Professional Experience

Associate Software Developer - Gartner   June 2017 – Present
Stamford, CT - http://www.gartner.com/

Product Delivery Team

- Identified and improved on product defined requirements for the main client-facing site as part of an agile scrum team
- Contributed to migrating a monolithic backend towards API based micro-services, improving usability, code maintenance and code readability
- Implemented auto-generating code documentation using Swagger for both new and existing APIs
- Regular consultation with product managers to refine implementations for upcoming projects
- Evaluate and define best practices for software design within the team

Finance Delivery Team

- Provided support to a legacy finance application based in PL/SQL
- Assisted in migrating the application to AWS
- Designed and Implemented a React-based application to generate finance reports
- Provided detailed code design documentation for each feature being developed
